

Accessing Online Plats of Survey Via Milwaukee County's *Interactive Mapping Service*

<http://maps.milwaukeecounty.org/>

Various methods may be employed to access plats of survey through the *Interactive Mapping Service*. The most direct method is detailed below.

1) Locate and Activate the Plat of Survey Layer

In the Layer List (below), locate the "Plat of Survey" layer found in the "Map Layers" group. Click the checkbox to the right of the layer's name to ensure that features in the Plat of Survey layer will be visible.

2) Locate a Parcel of Interest

Using the Zoom tools found in the Navigation Toolbar, zoom in to an area of interest. When a parcel is outlined in red, the parcel has one or more associated survey documents that are currently available online (see status map at the end of this tutorial).

3) Launch the Feature Hyperlinks Window and Access a Plat of Survey PDF

Once a parcel of interest with an associated plat of survey has been located, access the Selection Toolbar (below) and click on the “Link” button to activate the “Feature Hyperlinks” tool.

After clicking on a parcel of interest with the “Feature Hyperlinks” tool, the Feature Hyperlinks window (below) will appear to display any links associated with the selected parcel. Click on a hyperlink in the “Plat of Survey” section of the window; a new browser tab or window will appear to display a plat of survey document in PDF format.* Hold down your control key while clicking on the link if you encounter popup blocker issues.

*PDF documents are viewed with *Adobe Reader*. If you do not have *Adobe Reader*, a copy can be downloaded for free at <http://get.adobe.com/reader/otherversions/>.
